EDUCATION

University of Manitoba

Bachelor of Science, Major in Computer Science

Relevant Coursework: Analysis of Algorithms, Database Concepts and Usages, Object-Oriented Programming

Winnipeg, MB

2021 - Present

SKILLS

Languages: TypeScript, JavaScript, Python, C++, C, Java, HTML/CSS

Frameworks & Libraries: React, Node.js, Express.js, Django, REST APIs, OpenCV

Developer Tools: AWS (S3, SDK), Redis, Git, MongoDB, MySQL, SQLite, Jira, Linux, macOS, Windows

EXPERIENCE

Software Development Team Member | *React, JavaScript, Python, C, HTML/CSS*

UMSATS (University of Manitoba Space Applications and Technology Society)

Dec. 2024 – Present.

- Developed software tools and libraries, including a web-based telemetry dashboard, a firmware library for in-flight operations, and a **-testing interface** for satellite component debugging
- Utilized React to update and enhance the functionality of the **telemetry dashboard**, improving usability and performance
- Collaborated with interdisciplinary teams to assist subsystems in optimizing their codebases, reducing development time

IT Service Desk Analyst | *Active Directory, Exchange, SCCM*

IST Technology Services - University of Manitoba

Sept. 2024 - Present

- Resolved 1000+ technical support tickets with a 95% first-contact resolution rate
- Reduced average resolution time by 25% through improved **documentation** and **troubleshooting workflows**
- Collaborated with IT teams to resolve complex issues involving Active Directory, Exchange, and SCCM-Created knowledge base articles, improving team efficiency and user self-service

Data Analyst | *Python, Pandas*

Freelance

May 2023 - Sept. 2024

- Analyzed index funds using **Python's Pandas** library to uncover trading patterns and correlations-Delivered actionable insights from complex data analysis, enabling clients to make informed trading decisions
- Developed automated **data processing** pipelines to streamline **analysis workflows**

PROJECTS

AI-Powered Web Editor [GitHub](#) | *Node.js, React, Claude SDK, Web Containers*

- Developed a full-stack application integrating GPT and Claude SDK for AI-assisted web development
- Reduced deployment complexity by 40% using **Web Containers** for a seamless development experience
- Increased user engagement by 65% through an intelligent prompt system enhancing productivity

Crime Analysis & Visualization Platform [GitHub](#) | *Python, Pandas, MySQL, Java*

- Created a data visualization platform processing 10+ years of crime data for analytical insights
- Implemented automated ETL pipelines ensuring daily updates and maintaining data integrity

Online Food Ordering Platform [GitHub](#) | *JavaScript, Next.js, SQLite, Tailwind*

- Collaborated with a team of four to develop an intuitive food
- Implemented a specific food search feature, streamlining dish discovery and enhancing user convenience
- Integrated a double confirmation checkout process, reducing order errors by 20% and increasing user confidence

AWS-Based Deployment Platform for React Websites [GitHub](#) | *TypeScript, Node.js, Express, Redis, AWS SDK*

- Built a Vercel-inspired deployment platform handling React website deployments
- Implemented efficient file management using **AWS S3** and **Redis** queues for optimized performance
- Reduced deployment times by 50% by streamlining the process into a single-step operation
